

**Agren, Quentin, Sciences Po**

Quentin Agren graduated from the Ecole Normale Supérieure de Lyon with a Master's degree in Information Architecture, writing a thesis on the topic of data engineering at the Massachusetts Institute of Technology. In his first role as Research Engineer, Quentin developed a peer-assessment application for massive online courses, then joined the CDSP in June 2017 as a Research Engineer in web development. He has since taken an active part in major development projects where his expertise in Python and JavaScript, as well as a real interest in formalising complex architectures and workflows is an asset. He contributes to WP4 of an H2020 program, the Social Sciences and Humanities Open Cloud (SSHOC), as lead developer for WP4: "developing a sample management system for a cross-national web panel".

**Andersson Schwarz , Jonas, Sodertorn University (Stockholm, Sweden)**

Senior Lecturer / Associate Professor, Media & Communications, Södertörn University, with a research interest in how everyday life and social structures are affected by increasing digitalization. Studies digital platforms and their role as structural phenomena, particularly in terms of political economy, social philosophy, epistemology, and ontology.

**Axelsson, Sofia, University of Gothenburg**

Sofia Axelsson is Associate Researcher at the the Department of Political Science, University of Gothenburg. She is the Research Coordinator of the interdisciplinary projects Language Effects in Surveys and Studying Opinions and Populations in Online Text Data, which span across the disciplines of Political Science, Computational Linguistics and Computer Science. Her research interests include comparative survey methodology with a focus on translation and social scientific applications of online text data.

**Becker, Charlotte Clara, University of Cologne**

Charlotte Becker is a researcher at the Institute of Sociology and Social Psychology, University of Cologne, Germany. She received her bachelors and masters degree in sociology from the University of Mannheim, Germany. Currently, she is also a member of the Cologne Graduate School in Management, Economics and Social Sciences conducting her Ph.D. on the topic of measuring and explaining school children's attitudes towards minorities. Her research interests lay in the areas of cross-cultural comparability of attitudes and the value-attitude relationship.

**Berlin, Yael, Israel Central Bureau of Statistics**

Employed by the Israel Central Bureau of Statistics as a coordinator since 2012. In this role I establish the working practices of household budget surveys, supervise surveyor training, and oversee the fieldwork. In addition to the ongoing research of existing work processes, I have performed research work pertaining to the investigation of the diary in Household budget survey

**Beuster, Benjamin, NSD - Norwegian Centre for Research Data****Bottoni, Gianmaria, City, University of London**

Gianmaria Bottoni has a doctorate in Research Methods for Social Sciences. He is a Research Fellow based at European Social Survey ERIC HQ, Lecturer in Multivariate Data Analysis at Department of Sociology at City, University of London and work package Leader for the development of a cross-national web survey under the EC-funded H2020 SERISS project. Prior to joining City, University of London he worked as Researcher and Teaching Assistant in Quantitative Research Methods for Social Sciences and Methodology of Social Sciences at University of Salerno. He is also a Lecturer at Summer School on

Methods of Social Sciences (recognized as School of High Education by Italian sociological association) and he has been a Visiting Researcher at the Department of Methodology and Statistics at University of Utrecht. His research interests are cross-national comparative studies, social cohesion, quality of life, and advanced quantitative research methods (Multilevel modeling, Structural Equation Modeling, Multilevel SEM).

**Brislinger, Evelyn, GESIS-Leibniz Institute for the Social Sciences**

Evelyn Brislinger is senior project manager at the GESIS-Leibniz Institute for the Social Sciences. She coordinated the data management for various national and international survey programmes and is responsible for the processing and publication of data from the European Values Study (EVS 1981-2017). She is currently involved in the SERISS project (HORIZON 2020 Work Programme), which establishes and evaluates a virtual collaborative workplace supporting survey teams and stakeholders of survey projects. The current EVS 2017 wave serves as a pilot project in this project.

**Broich, Carsten, Sample Solutions BV**

**Butt, Sarah, City, University of London**

Dr Sarah Butt is a Research Fellow at City, University of London and a Deputy Director of the European Social Survey ERIC. She is involved in questionnaire design and fieldwork monitoring for ESS. Sarah is currently managing the H2020 SERISS project (Synergies for Europe's Research Infrastructures in the Social Sciences) a collaboration with SHARE, CESSDA, GGP, EVS and WageIndicator which aims to foster interoperability and innovation among social science research infrastructures.

**Cibelli Hibben, Kristen, University of Michigan**

Kristen Cibelli Hibben (Ph.D) is a Survey Methodologist in the International Unit within the Survey Research Center. She received her PhD in Survey Methodology from the University of Michigan and her Masters of Science degree from the Joint Program in Survey Methodology from the University of Maryland at College Park. She has authored and co-authored numerous invited book chapters and journal articles, and has contributed extensively to the Cross-cultural Survey Guidelines (<http://ccsg.isr.umich.edu/>), and has conducted an external quality assessment for a large 3MC survey. Prior to her graduate studies and work in survey research, Kristen worked in the area of international human rights. This work involved working with a variety of partners including truth commissions, human rights commissions, the United Nations and numerous non-governmental organizations on the collection, management and analysis of data about human rights abuses in countries including Liberia, Sierra Leone, Nigeria and Thailand (for Burma). Kristen received her Bachelor of Arts degree in International Relations with a certificate in Peace and Justice Studies from Tufts University in Medford, Massachusetts.

**Cuba Gyllensten, Amaru, RISE AI**

Amaru is an industrial PhD candidate at RISE and KTH, working in the field of Natural Language Processing and Machine Learning. His main research interest is in developing, extending and applying language models, in particular in the context of social science and social media monitoring.

**Dahlberg, Stefan, University of Gothenburg**

Stefan Dahlberg is Professor at the Department of Comparative Politics at the University of Bergen and Associate Professor at the Department of Political Science at the University of Gothenburg. Dahlberg is Research Director of the Digital Social Science Core Facility (DIGSSCORE) at the University of Bergen and Database Manager at the Quality of Government Institute at the University of Gothenburg. Dahlberg is

also one of the founders of the Swedish Citizen Panel and the Laboratory of Opinion Research (LORe) at the University of Gothenburg and he is a member of the Swedish National Election Studies (SNES). Dahlberg is currently leading two larger interdisciplinary research projects with the aim of analyzing language use in so-called 'big online data', that is editorial and social media data across the globe by relying neural network algorithms.

**Davidov, Eldad, University of Cologne and University of Zurich**

Eldad Davidov is professor of sociology at the Universities of Cologne (Germany) and Zurich (Switzerland) and co-director of the university research priority program on social networks at the University of Zurich. He was president of the European Survey Research Association (ESRA) between 2015 and 2017. His research interests concentrate on structural equation modeling especially applied to cross-cultural and longitudinal survey data. In his research he analyzes human values and attitudes toward immigrants or other minorities.

**de Jong, Julie, University of Michigan**

Julie de Jong (M.S.) is a Survey Methodologist in the International Unit within the Survey Research Center, and holds a Master's Degree in Survey Methodology from the University of Michigan. She has managed numerous mono-country surveys as well as several large cross-cultural surveys, with a focus on promoting survey research best practices, specifically in countries with limited survey research capacity and infrastructure. She has authored and co-authored numerous invited book chapters and journal articles, has conducted an external quality assessment for a large 3MC survey, and has contributed extensively to the Cross-cultural Survey Guidelines, an online resource for the design and implementation of international, multinational, multiregional, and multicultural surveys. She has also conducted complex analyses and co-authored several publications examining measurement error resulting from both interviewers and the interview setting in cross-national surveys.

**Dorer, Brita, GESIS-Leibniz Institute for the Social Sciences**

Brita Dorer is a translation scholar working at GESIS – Leibniz Institute for the Social Sciences. Since 2009, she has been heading the translation team of the European Social Survey (ESS), overseeing the questionnaire translation activities in the ESS and also member of the ESS questionnaire design group. She is currently leading the workpackage "Maximising equivalence through translation" in the SERISS cluster project (Synergies for Europe's Research Infrastructures in the Social Sciences). Besides her long-term work in the ESS, she has vast experience in questionnaire translation also from other projects, both from assessing questionnaire translation approaches for other cross-national surveys, for instance for eurofound, and being part of translation teams for surveys such as ISSP, PIAAC and SHARE. She is one of the editors of the volume "Advances in Comparative Survey Methods: Multinational, Multiregional and Multicultural Contexts (3MC)" published at Wiley in 2018 together with Timothy P. Johnson, Beth-Ellen Pennell and Ineke Stoop. She is about to finish her PhD in translation sciences on the 'advance translation', a method to increase source questionnaire translatability. Her scientific interests are the evaluation and quality enhancement of questionnaire translation and adaptation, translatability of source questionnaires, close versus adaptive translation, and translation process research. She holds a degree in English, French and Italian translation studies from Johannes-Gutenberg-University Mainz, FTSK Germersheim, as well as a degree in 'Interfacultative Studies on France' from the Albert-Ludwigs-University in Freiburg im Breisgau and has been acting as academic teacher at universities in translation sciences in Germany and Switzerland.

**Fitzgerald, Rory, ESS ERIC**

Professor Rory Fitzgerald became Director of the European Social Survey (ESS) in 2013 having been a Senior Research Fellow at City, University of London since 2004. In November 2013, the UK and 14 other European governments established the European Social Survey as a European Research Infrastructure Consortium (ESS ERIC) – an independent international research organisation hosted at City, University of London. ESS ERIC now has 23 Members and one Observer. Rory is the first Director of ESS ERIC and oversees the ESS Core Scientific Team (CST) and the ESS National Coordinators Forum. In addition to these committees he works closely with the General Assembly and the Scientific and Methods advisory boards. The ESS is a rigorous comparative biennial survey of changing attitudes and values in up to 34 European countries. With other members of the CST, he was awarded the Descartes Prize in 2005 for “excellence in collaborative scientific research”. In 2016 the ESS was declared to be a landmark infrastructure by the European Strategy Forum for Research Infrastructures in Europe (ESFRI). There are just over 130,000 registered users of the ESS data and over 3500 publications using the data available online. From 2015 he has coordinated two H2020 awards totalling over €10 million. This included a grant to promote the sustainability of the ESS and another - SERISS - which supports pan-social science infrastructure collaboration in Europe. Rory is also an Associate Editor of the Survey Research Methods Journal.

**Flores Cruz, Ramiro, Ramiro Flores cruz**

Ramiro Flores Cruz is a partner at Sistemas Integrales Consulting and has over 15 years of experience in the design and implementation of surveys in areas such as labor force, living standards, household budget, health and impact evaluation. He is a consultant to governments, statistical offices, universities and international agencies such as the World Bank and the Inter-American Development Bank. His main areas of expertise are sampling and survey quality assurance, and has also advised on questionnaire design, fieldwork operations and data management in countries in the Americas and Asia. Ramiro holds a BA in Sociology, an MA in Demography and post-graduate studies in sampling and applied statistics at the University of Michigan. He lives in Buenos Aires and is fluent in Spanish, English and French, and speaks some German and Portuguese.

**Goerman , Patricia, U.S. Census Bureau**

Patricia Goerman leads the Language and Cross-Cultural Research Group in the Center for Survey Measurement at the U.S. Census Bureau. She has 15 years of experience in the development and pretesting of multilingual survey instruments, with a focus on Spanish-language materials. Her research interests include questionnaire design and cross-cultural issues in surveys. She has a Ph.D. in Sociology from the University of Virginia.

**Guenova, Aneta, Department of State**

Aneta Guenova is a foreign affairs research analyst in the Office of Opinion Research at the US Department of State. She works on quantitative and qualitative research studies in Central and Eastern Europe. Her own research interests include using experimental design and cognitive interviewing for testing survey questions. She holds an M.A. in Public Communication from American University in Washington, DC.

**Iwai, Hachiro, Kyoto University, Japan**

Hachiro Iwai is Professor of Sociology of Education, Graduate School of Kyoto University, Japan. The research focuses on life course changes in Japan, using quantitative life history data.

**Iwai, Noriko, JGSS Research Center, Osaka University of Commerce**

Director of Japanese General Social Survey Research Center (2008-present)/Professor (2002-present), Faculty of Business Administration, Osaka University of Commerce Board Member of the Japan Society of Family Sociology, 2004-2010, 2013-2016 Director of Conference Committee, 2013-2016 Board Member of the Japan Sociology Society, 2012-2015, 2018-2021, Executive Director, 2018-2021 Member of Science Council of Japan, 2011-present Auditor of the Japanese Association for Social Research, 2016-present

**Jiang, Shulin, PMA, Johns Hopkins Bloomberg School of Public Health**

Shulin Jiang is a Research Data Manager at PMA, Johns Hopkins Bloomberg School of Public Health. She supports data management and analysis activities across all program countries. In this role, she provides technical support, oversight, and training to all program countries, as well as developing novel data management tools to improve data quality. Her main field of research interests is the methodology of comparative surveys and the use of paradata. She has a Master of Science in Public Health degree from the Department of International Health at the Johns Hopkins Bloomberg School of Public Health, with a concentration in Global Disease Epidemiology and Control.

**Johnson, Timothy, University of Illinois at Chicago**

Timothy Johnson is Director of the Survey Research Laboratory and Professor of Public Administration at the University of Illinois at Chicago. He has participated in CSDI meetings for many years.

**Kelley, Jennifer, University of Michigan; University of Essex**

Jennifer Kelley is a survey methodologist at the University of Michigan Survey Research Center. She has been involved with several large surveys, including the World Mental Health Survey in the Kingdom of Saudi Arabia, the National Survey of Family Growth in the United States and the Health and Retirement Study, focusing on technology development, interviewer training and quality control. Another focus of Jennifer's is questionnaire development and testing. Jennifer received her master's degree in Survey Methodology from the University of Michigan and is currently working on her PhD in Survey Methodology at the University of Essex, U.K. Her research focuses on using paradata to assess and understand interviewer question-reading behavior and its effect on data quality.

**Kiersztyn, Anna, University of Warsaw**

Anna Kiersztyn is an assistant professor of Sociology at the Institute of Sociology, University of Warsaw. Her current research concerns the distribution, dynamics and social consequences of non-standard employment, and the relationship between alternative work arrangements and the quality of jobs. She is the author of several research articles analyzing the incidence and correlates of overeducation, low paid and unstable employment in the Polish economy. Her more recent work analyses the consequences of labor market precariousness with respect to economic and social security and political participation, with a focus on conditional relationships. Since 2005, Kiersztyn has also collaborated with the Team for Comparative Analysis of Social Inequalities (CASIN) at the Institute of Philosophy and Sociology, Polish Academy of Sciences. She has been involved in the Polish Panel Survey POLPAN project, analyzing long-term changes in the social and occupational structure of the Polish Society, as well as individual labor market trajectories.

**Kołczyńska, Marta, Institute of Philosophy and Sociology, Polish Academy of Sciences**

Postdoctoral researcher

**Kutka, Andreas, Sistemas Integrales**

Andreas is a survey expert with extensive experience in the design, implementation and management of electronic data collection exercises and an Associate Consultant at Sistemas Integrales. He has successfully managed numerous large-scale surveys across various countries and settings. Andreas is deeply familiar with all stages of a survey live cycle and the field. He has experience with a variety of survey types and complex survey designs. In many of his projects he has used innovative data collection technologies or methods. As a survey and CAPI expert, Andreas has advised several organisations and national agencies on the design, implementation and quality assurance of surveys. His focus of interest is the development of comprehensive quality assurance systems that improve data validity. Andreas holds a MSc in Development Economics from the University of Oxford and a BA in Development Studies from the University of East Anglia. He lives in Barcelona, speaks fluent English, German and Spanish and some French and Catalan.

**Lavryk, Denys, Institute of Philosophy and Sociology, Polish Academy of Sciences**

Phd Student at the Graduate School for Social Research, Institute of Philosophy and Sociology, Polish Academy of Sciences. Graduated from the Master's program in Sociology in the National University of Kyiv-Mohyla Academy.

**Lee, Sunghee, University of Michigan**

Sunghee Lee is an associate research scientist at University of Michigan Institute for Social Research. Her research interest includes sampling and measurement issues for racial, ethnic, linguistic and sexual minority populations.

**Lyberg, Lars, Inizio**

Lars Lyberg is former Head of the Research and Development Department at Statistics Sweden and retired Professor at the Department of Statistics, Stockholm University. Currently he is associated with Inizio, a research firm in Sweden. He is the founder of the Journal of Official Statistics (JOS) and served as Chief Editor for 25 years. He is a fellow of the American Statistical Association and the Royal Statistical Society and elected member of the International Statistical Institute. He received the 2012 Waksberg Award, the 2013 Helen Dinerman Award, and the 2018 AAPOR Award. He is a member of the Technical Advisory Boards of PISA for Development and PIAAC.

**Michaud, Geneviève, Sciences Po**

Geneviève Michaud worked more than ten years as a Research Engineer, System Administrator in the Mathematical Modeling, Computer Science and Physics Department at AgroParisTech. Recruited by the CNRS (French National Centre for Scientific Research), she joined the CDSP of Sciences Po as Project Manager Expert in Software Engineering in 2006. As head of the IT team since 2011, she has been in charge of the IT infrastructure supporting several projects including: ELIPSS Panel (Longitudinal Internet Studies for Social Sciences) and beQuali, a Qualitative Data Bank. Both projects are part of DIME-SHS (Data, Infrastructure, Methods of Investigation in the Social Sciences and Humanities), a nine years project funded by the French National Research Agency.

**Mneimneh, Zeina, University of Michigan**

Zeina Mneimneh is an Assistant Research Scientist in the Survey Methodology Program and the Director of the International Survey Unit within the Survey Research Center, University of Michigan. She is also an affiliated Assistant Research Professor in the School of Public Policy at Georgetown University and the director of the Data Collection Coordinating Center that supports the design and implementation of national mental health surveys in more than 35 countries. Dr. Mneimneh has published more than 35

peer-reviewed publications and book chapter. Her research investigates factors affecting the reporting of sensitive information including interviewer, respondent, and question characteristics, and contextual factors related to culture and the interview setting. Her recent work examines the use of paradata to monitor interviewer behavior and the use of social media data for social science research.

**Mohler, Peter, Mannheim University**

Mohler, Peter Peter Mohler, is, time permitting, thinking about comparative survey quality. For several decades he worked at ZUMA (GESIS). In addition to his work on computational content analysis (aka big data - TEXTPACK with C. Züll), he co-edited the first ever volume on comparative survey methodology (with J. Harkness and F. van de Vijver, 2003). He was involved in the production of the German General Social Survey (Allbus), the International Social Survey Programme (ISSP) and the European Social Survey (ESS).

**Munoz, Juan, Sistemas Integrales**

Founder and managing partner of Sistemas Integrales, a firm created and based in Santiago, Chile, in 1970. Interested in the application of statistics and computer science to economics, health, education and agriculture. As a consultant for universities, governments, international agencies and private clients, has assisted in the design, implementation, steering and analysis of censuses and agriculture, budget, consumption, demographic, living standard, labor, and opinion surveys in many countries.

**Muszyński, Marek, Jagiellonian University**

PhD student at the Institute of Sociology, Jagiellonian University and expert at the Centre for Evaluation and Analysis of Public Policies (CEAPP). Previously worked as research specialist at the Educational Research Institute (IBE) and Evidence Institute in Warsaw, Poland. My main research interests are focused on developing and validating methods of reducing response biases in self-rating methods (questionnaires, surveys, etc.). I intend to design new methods of preventing or correcting for response biases (mainly socially desirable responding-SDR) to enhance quality of self-rating data. This research is supervised by Prof. Jarosław Górniak at the Institute of Sociology, Jagiellonian University.

**Nguyen, P. Linh, University of Essex/ University of Mannheim**

P. Linh Nguyen is a PhD candidate in the programme in Survey Methodology at the University of Essex and works at the University of Mannheim. For her PhD project, she has designed and implemented survey experiments in a panel survey with members of so-called savings groups in rural and semi-urban areas of 3 Zambian provinces. Her research focuses on interviewer effects and interviewer behaviour.

**Nikolova, Katerina, Sample Solutions BV**

**Olsson, Fredrik, RISE AI**

Fredrik Olsson, PhD, is a Senior Research Scientist in natural language processing and machine learning at RISE AI. Olsson has extensive experience of working with data intensive methods at the intersection of language engineering and applied machine learning, in particular with data originating from social media and news outlets.

**Orten, Hilde, NSD - Norwegian Centre for Research Data**

Hilde Orten is sociologist by training with an additional lower degree in philosophy. She currently works at NSD, where she was employed at the European Social Survey Data Archive since the start in 2002. Since 2012 she has been working on metadata and specifications for survey tools developed at NSD. Hilde is involved in the work of the Data Documentation Initiative (DDI) Alliance as member of the of DDI4 Core Modelling, Representation and Testing Working Group and other working groups.

**Padilla, Jose-Luis, University OF Granada**

Jose-Luis Padilla is a Full Professor at the Department of Methodology of Behavioral Sciences at the University of Granada (Spain). He teaches graduate and master courses of psychometrics, data analysis, questionnaire and test design, validity theory, questionnaire and test adaptation, and cognitive pre-test methods. His current research focuses on psychometrics, questionnaire development, validity, and cross-cultural survey and testing research within a mixed method framework combining quantitative and qualitative methods like cognitive interviewing, behaviour coding or focus groups. He is currently co-editor of Methodology journal, the official journal of the European Association of Methodology, and is also member of the QUEST (Questionnaire Standards for question evaluation methods) network.

**Parent Thirion, Agnes, Eurofound**

Agnès Parent-Thirion is senior researcher in the Working life research Unit at the EU Agency Eurofound for the improvement of living and working conditions. She has been working in the European social research for over 20 years. She's currently in charge of the development, and implementation of comparative European Working Conditions Surveys (EWCS) which paints a wide-ranging picture of Europe at work across countries, occupations, sectors and age groups and allows to help policy actors to address the challenges facing Europe today. The sixth survey, in 2015, interviewed nearly 44,000 workers in 35 countries. The 7th edition is planned for 2020. She is also in charge of the global working conditions project. Her research interests include job quality, the monitoring of working conditions and work organisation, gender, and the future of work.

**Platek, Daniel, ISP PAN**

I am a researcher interested in analytical sociology, especially survey design for network analysis and natural language processing.

**Przepiórkowska, Danuta, University of Warsaw**

Linguist/translator (Warsaw), sociologist (Lancaster). Chief Translator at the European Social Survey national team in Poland. Member of the ESS Translation Expert Panel. Currently finishing her PhD in Warsaw, previously worked at GESIS Mannheim (Cross-Cultural Survey Team). Holder of the UK Ciol Diploma in Translation.

**Raza, Mahjabeen, New York University****Rybak, Adam, Adam Mickiewicz University in Poznań**

Adam Rybak is a PhD student at the Institute of Sociology, Adam Mickiewicz University in Poznań. His planned PhD thesis concerns the meta-analysis of comparative surveys design impact on the various measures of their representativeness. Also, he still develops his analysis of survey mode preferences in Poland, which he began while preparing his master's thesis.

**Sahlgren, Magnus, RISE**

Magnus Sahlgren is Head of Natural Language Processing at RISE SICS. Sahlgren's research interest lies at the intersection between Computational Linguistics, Machine Learning, and Artificial Intelligence. He is known for his work on computational models of meaning, and for his work on developing and applying efficient and scalable algorithms that can learn such models from large-scale text data. He holds a PhD in Computational Linguistics from Stockholm University, Sweden. His dissertation "The Word-Space Model" was awarded the prize for the most prominent scholarly achievement of 2006 at the Stockholm University Faculty of Humanities.

**Sadowski, Ireneusz, Institute of Political Studies of the Polish Academy of Sciences**

Ireneusz Sadowski is sociologist, assistant professor at the Institute of Political Studies of the Polish Academy of Sciences. His research interests prominently includes social structure, institutions, and contingencies between those two spheres. In the recently published book "Individuals and Their Social Contexts" (2018), co-edited with B. W. Mach, he authored several chapters involving, among other topics, problem of homophily and a role played by social networks in job-finding. In one of the recent articles he analyzed the electoral competition and party switching in the context of electoral laws in Ukraine (Game of Seats: Electoral Rules, Revolutions, and Affiliation Switching in Ukraine, 1990–2014, in: East European Politics and Societies 2018). Full list of his publications is available at: [http://www.spoleczenstwo.pl/?page\\_id=14](http://www.spoleczenstwo.pl/?page_id=14).

**Sarkar, Mousumi, Well World Solutions, LLC**

Ms. Mousumi Sarkar is the founder of Well World Solutions, LLC and brings more than 20 years of experience in survey design, implementation and analysis. She has also conducted considerable qualitative research. One of her recent projects involved creating measurements for required indicators for USAID Youth Workforce Development Programs, and testing them in multiple countries and contexts.

**Sarracino, Francesco, Statistical Office of Luxembourg**

Francesco Sarracino is senior economist at STATEC, the statistical office of Luxembourg. His work aims at identifying policies to make economic growth compatible with a well-being and, ultimately, to pursue sustainable development. His research focuses on developed and developing countries and is based on within and cross-country empirical evidence. In recent years he also contributed to methodological research on online surveys.

**Sawiński, Zbigniew, Institute of Philosophy and Sociology, Polish Academy of Sciences**

Zbigniew Sawiński is Professor at the Institute of Philosophy and Sociology of the Polish Academy of Sciences. His interests include: social stratification, educational inequalities, longitudinal surveys. His latest publications concern the impact of school reforms on educational inequalities in Poland. He is a co-author of the Polish Social Classification of Occupations (along with H. Domański and K. M. Słomczyński) and the author of the Social Classification of Schools and Education in Poland. He has extensive experience in comparative and longitudinal surveys. In the 1990s he was involved in running ISSP modules in Poland, since 2002 he has been working in teams that run the ESS, PISA and PIAAC. Since 1988, he is the Data Design Director in the Polish Panel Survey POLPAN, which is one of the world's longest-lasting lifecycle surveys.

**Schoua-Glusberg, Alisu, Research Support Services**

Alisú Schoua-Glusberg is a cultural/linguistic anthropologist with over 30 years of experience in survey instrument translation and adaptation. She is a survey methodologist with particular expertise in the use of qualitative research to support multilingual instrument design. Since 1988 she has directed surveys at the National Opinion Research Center, Harvard University Medical School, Metropolitan Chicago Information Center, IMPAQ International, and Research Support Services. Dr. Schoua-Glusberg has specialized in research studies with Hispanic populations, and in particular with Latin American immigrants, including topics such as methodology for instrument translations and qualitative pretesting of survey instruments in Spanish. An expert cognitive interviewer, since 2005 she has trained others internationally on cognitive interviewing techniques. In 2014 she co-authored a book chapter, "Assessing Translated Questions via Cognitive Interviewing." Alisú has served on the US Census Bureau Expert Panel on Translation and is a current member of European Social Survey Translation work group. She has written and presented extensively on the topic and has taught translation short courses and webinars on survey translation. She has led the Spanish translations for major US surveys, including the ECLS-K, MGLS, NPSAS:16, HSL:09, the Education Longitudinal Study of 2002, the National Immunization Survey, National Survey of Family Growth, National Children's Study, National Household Study on Drug Abuse, General Social Survey, Panel Survey of Income Dynamics, and the American Time Use Survey.

**Slomczynski, Kazimierz, The Ohio State University and Polish Academy of Sciences**

Kazimierz M. Slomczynski is Professor Dr. Hab. at the Institute of Philosophy and Sociology, Polish Academy of Sciences (PAN), and Emeritus Professor, Department of Sociology, The Ohio State University (OSU). He directs the Cross-National Studies: Interdisciplinary Research and Training program (CONSIRT) of the OSU and PAN. Professor Slomczynski is Principal Investigator of the Democratic Values and Protest Behavior: Data Harmonization, Measurement Comparability, and Multi-Level Modeling project, funded by Poland's National Science Centre. He also directs the Polish Panel Survey, POLPAN (POLPAN.org).

**Smith, Tom W, NORC****Tomescu-Dubrow , Irina, IFiS PAN and CONSIRT at The Ohio State University and Polish Academy of Sciences**

Irina Tomescu-Dubrow is associate professor of sociology at the Institute of Philosophy and Sociology, Polish Academy of Sciences (PAN), and program manager for CONSIRT - Cross-national Studies: Interdisciplinary Research and Training program of The Ohio State University (OSU) and PAN. She studies social inequality, stratification and structural change, and is involved in cross-national methodology research, including ex-post survey data harmonization.

**Wysmułek, Ilona, Institute of Philosophy and Sociology, Polish Academy of Sciences**

Ilona Wysmułek is an Assistant Professor in Sociology at the Polish Academy of Sciences, Warsaw and a member of the Interdisciplinary Corruption Research Network. She has participated in a number of projects, among them the Polish Panel Survey POLPAN and the SDR project on survey data harmonization, where she supervises work conducted on over 3,000 national surveys of 24 international projects. Her main research interests cover topics of corruption, meritocratic attitudes, and cross-national survey quality and harmonization.

**Yoshino, Satomi, JGSS Research Center, Osaka University of Commerce**

Satomi Yoshino is a research fellow in the JGSS (Japanese General Social Survey) Research Center at Osaka University of Commerce in Japan. Prior to joining JGSS Research Center, she was a technical officer at World Health Organization Centre for Health Development, where she worked on the development of health research projects. Her research interest includes cross-cultural survey design and questionnaire development. She holds a Doctorate degree from the University of Alberta in Human Ecology.
