Developing interactive tools for cross-national surveys: Results from the SERISS project

Sarah Butt (ESS ERIC)

CSDI Workshop

Warsaw, 19 March 2019

This project has received funding from the *European Union's Horizon 2020 research and innovation programme* under grant agreement No 654221.

A collaboration between:

- European Social Survey (ESS ERIC)
- Survey of Health, Ageing and Retirement in Europe (SHARE ERIC)
- Consortium of European Social Science Data Archives (CESSDA ERIC)
- Generations and Gender Programme (GGP)
- European Values Study
- WageIndicator Survey

European *Values* Study

WageIndicator.org

This project has received funding from the *European Union's Horizon 2020 research and innovation programme* under grant agreement No 654221.

SERISS aims to ...

- **Address key challenges for cross-national data collection** e.g. accurately representing the population, achieving equivalence through translation
- **Break down barriers between social science infrastructures** via training and networking events and the development of shared online tools to facilitate harmonised data collection and documentation.
- **Embrace the future of the social sciences** by examining the legal and ethical challenges associated with new forms of data, developing a cross-national probability-based web survey and exploring automated coding for socio-economic variables
