

Vladimir Andreenkov is Director of the Institute of Comparative Social Research which is the Russian organization participating in the European Social Survey. From 1979-1999 he was Head of the Survey Methodology Department of the Institute of Sociology (IS) of the Academy of Sciences and of the Institute of Social and Political Research of the Academy of Sciences of the Russian Federation. Dr. Andreenkov was awarded a Ph.D. in Sociology at the Institute of Sociology, Academy of Sciences of the USSR in 1985. He has long-standing experience in cross-national survey research and has researched and published extensively in social values, attitudinal and behavioral research and longitudinal change in attitudes, values, and time use. Recent publications include the *Handbook of Sociologists*. Moscow, 2005, 1988, 1983 /Russian/ (with G. Osipov et al.).

Dorothee Behr joined ZUMA as a researcher at the European Centre for Comparative Surveys, ZUMA in January 2006. She graduated in Translation Studies (English and French) from the University of Heidelberg in 2005. At ZUMA her work focuses on translation and translation assessment in the ESS context. She is also working on a doctorate on translation and quality management in comparative survey research.

Annelies Blom came to ZUMA as a researcher at the Center for Comparative Surveys in November 2005. She is a member of the ESS Central Co-ordination Team and works on contract monitoring and translations. Previously, she worked at the National Centre for Social Research (NatCen) in London. Ms. Blom holds an MPhil in European Politics from Oxford University and a BA in Social Sciences from University College Utrecht. She is currently working on a PhD on non-response bias in cross-national surveys.

Laura Branden is a Senior Study Director at Westat in Rockville, Maryland with extensive experience managing various aspects of data collection for large computer-assisted in-person and telephone surveys. She is currently the associate

project director for the National Home Health and Hospice Survey and the National Home Health Aide Survey. She directed the National Nursing Assistant Survey which was part of the National Nursing Home Survey. She also directed the Early Childhood Longitudinal Study, Birth Cohort Child Care Provider (CCP) CATI survey. Before joining Westat in 1990, she was the data archivist for the National Longitudinal Surveys of Youth (NLSY-79). Her research interests are in survey methodology.

Michael Braun is a Senior Methods Consultant at ZUMA and directs the German General Social Survey (ALLBUS). He holds a habilitation from the University of Mannheim. Dr. Braun has specialised in cross-cultural survey methodology and analysis. He has played a major role in a number of ISSP questionnaire drafting groups (the multi-country groups responsible for designing and testing ISSP source questionnaires). He is involved in the ISSP methodology group dealing with intercultural comparability of the standard demography. His main research interest lies in the relation between question design, translation, and data analysis. In particular, he is concerned with the use of data-analytic methods to check the adequacy of translations. He also coordinates the national part of the EU-funded five-country study PIONEUR (Pioneers of Europe's Integration from "Below"). His most recent publications cover different kinds of errors in comparative surveys. A monograph to appear soon will address problems of comparability that are caused by the interaction of cognitive and communicative processes on the side of respondents and societal structures. He has also published extensively on international comparative research in the fields of inequality, work orientations and the family.

Stef van Buuren is statistician of TNO Quality of Life, and Professor of Applied statistics in prevention at the University of Utrecht. He developed a new post-harmonization technique, Response Conversion, for enhancing comparability. Other interests include multiple

imputation, human growth and adaptive testing.

Siobhan Carey is Chief Statistician at the Department for International Development in the UK. Before taking up this position she was Research Director in Social Survey Division of the Office for National Statistics. She has conducted large-scale surveys in the field of health and education and has recently been involved in numerous international projects. She was research director for the British survey in the International Adult Literacy Survey programme. She also led the international research programme on the conduct of the IALS following publication of the results from the first round of countries.

Rachel Caspar is a Senior Survey Methodologist at RTI International. Prior to joining RTI International she received a M.A. in applied social research from the University of Michigan, and a B.A. in sociology from Oberlin College. Ms. Caspar specializes in designing questionnaires and developing data collection procedures for surveys of sensitive topics. Her research interests include methods for adapting complex material and concepts to be easily and consistently understood by survey participants of all ages, educational, cultural and linguistic backgrounds, as well as methods for testing questionnaires. Ms. Caspar regularly teaches courses in questionnaire design and cognitive laboratory testing methods, most recently through the Joint Program in Survey Methodology, the Odum Institute at the University of North Carolina, and the Summer Institute at the University of Michigan. She currently serves as the Education Officer for the Survey Methods Research Section of the American Statistical Association.

Karl Dinkelman is Business Systems Analyst at the University of Michigan's, Institute for Social Research (ISR), Survey Research Centers (SRC). Karl spent 5 years as the Senior Programmer Analyst and technical advisor for the developmental activities of the World Mental Health (WMH) Surveys Initiative. The WMH Surveys Initiative is cross-national epidemiological mental health

research project involving 28 participating countries. The survey questionnaire marks the first major revision to the World Health Organization's (WHO) Composite International Diagnostic Interview (CIDI) since 1995. The unique nature of the CIDI is its capability of assessing mental disorders diagnostic criterion for the two different systems most widely used in world: the Diagnostic and Statistical Manual (DSM-IV) and the International Classification of Disease (ICD-10).

Karl is also a member of the Data Documentation Initiative - Instrument Documentation (DDI-ID) Working Group, a group charged with producing a data model that will allow data collection instruments to be documented within the DDI context (in the forthcoming DDI version 3.0). In addition, to the DDI-ID group he has also been working to identify survey lifecycle elements (particular from the data collection perspective) that have not typically been part of the DDI specification (with hopes of having an expanded set of these elements incorporated in DDI version 3.1).

Lauren Doerr is a Survey Director at the National Opinion Research Center at the University of Chicago (NORC). She has played a central role in developing and implementing interpretation and translation procedures for multilingual surveys at NORC, including the New Immigrant Survey and the Refugee Assistance Survey. She holds a B.A. in English-Spanish Comparative Literature and Anthropology from Haverford College, and a M.A. in Social Psychology from the University of Chicago.

Brad Edwards is a Westat Vice President and Area Director with extensive experience in large-scale survey management and design. He is the project director for the National Nursing Home Survey, a major data collection program for the National Center for Health Statistics, which collects data from national samples of nursing homes, home health agencies, and hospices, as well as samples of their patients and workers, using CAPI and CATI. Mr. Edwards is also the corporate officer for the Medicare

Current Beneficiary Survey (MCBS). In the early years of the MCBS (a decade ago) he provided close direction for the CAPI development, instrument design, and interviewer training tasks. He has leads a corporate effort at Westat to design efficient means for training field interviewers. Research interests include usability of data collection software, the use of incentives in surveys, quality of survey data collected from language minority populations, and methods for including language minorities and other relatively rare groups in surveys.

Patricia Gallagher is a Senior Research Fellow at the Center for Survey Research at the University of Massachusetts Boston. Her work centers on survey methodology, with a particular focus on health-related research. She has been a long time contributor to the Consumer Assessment of Healthcare Providers and Systems (CAHPS®) project. This work includes developing instruments and data collection protocols for gathering information from patients about their experiences. Cross cultural comparability is also a focus of her research as surveys in the US, including CAHPS, are now often fielded in multiple languages. Trish received her Ph.D. in Sociology from the University of Massachusetts Amherst.

Patricia Goerman is a Postdoctoral Research Fellow in the Statistical Research Division at the United States Census Bureau. Her current research focuses on the development and pre-testing of multilingual survey instruments with a focus on Spanish language materials. She received her Ph.D. in Sociology from the University of Virginia in 2004. Her dissertation is a study of Latino immigrants settling in non-traditional areas in the Southeastern United States. Her past research has included in-depth interviews with large numbers of Hispanic immigrants. She holds an M.A. in Sociology from the University of Virginia and a B.A. in Spanish, English, and Latin American and Iberian Studies from the University of Wisconsin-Madison.

Peter Granda is Assistant Director for Collection Development at the Inter-university Consortium for Political and Social Research (ICPSR) located at the University of Michigan. He also manages two of ICPSR's topical archives, the International Archive of Education Data and the Health and Medical Care Archive. He has a postgraduate degree in History (India) and spent several years of study in the southern part of the subcontinent. He now assists researchers who work with comparative data. Along with colleagues at the Zentralarchiv at Cologne, he established a partnership to process and distribute Eurobarometer surveys for secondary analyses.

Reto Hadorn has done research as a trained sociologist in educational and criminal sciences. He works for 13 years now at SIDOS, the Swiss information and data archiving service for the social sciences, setting up and maintaining the procedures for data acquisition, processing, documentation and distribution. He has taken part in the EU funded MetaDater and Madiera projects, concerned in the first place with metadata structures (complex datasets, question structures, multilingual thesauri).

Lisa Hanna is a social scientist and postdoctoral research fellow in the department of Community Health Sciences, University of Edinburgh, where she has been an active member of a research team investigating ethnicity and health. In collaboration with Professor Raj Bhopal and Dr Sonja Hunt, Lisa has carried out qualitative research on the cross-cultural comparability of the Rose angina questionnaire across cultural and linguistic groups, and on developing a cross-culturally valid tobacco questionnaire for use in ethnic minorities. She has lectured to health boards and agencies across Scotland, and acted as a consultant to the U.K. Home Office, on the importance and challenges of cross-cultural adaptation of health status instruments.

Janet Harkness is a cross-cultural survey methodologist with expertise in instrument design, adaptation, and implementation. She has a multi-disciplinary academic background and training – comparative medieval studies (M.A.); linguistics, cultural anthropology (Ph.D.); survey methods and cross-national survey research (ZUMA). Before being appointed to the Donald and Shirley Clifton Chair in Survey Science at the University of Nebraska-Lincoln in autumn 2005, she was Director of the International Social Survey Programme (ISSP) for Germany and Senior Scientist at ZUMA. She is a member of the Central Co-ordinating Team of the European Social Survey (ESS) and heads the Translation Work Package for the ESS. She also heads several methods work groups in the ISSP and co-ordinates the ISSP Methodology Committee. She continues her affiliation with ZUMA as a Senior Research Scientist. She has published, presented, and taught on numerous aspects of cross-cultural survey research and communication and was editor-in-chief of *Cross-Cultural Survey Methods* (Wiley, 2003).

Juergen H.P. Hoffmeyer-Zlotnik studied Sociology at Berlin and Hamburg. He holds a Doctor of philosophy from the University of Hamburg and a habilitation from Univ. of Cologne and Univ. of Giessen. Project director at GEWOS, Hamburg 1976/77; scientific assistant at Univ. of Trier 1978-1980. He has been at ZUMA since 1980 and is currently senior methods consultant there.

Main focus at research: (1) standardization and harmonization of demographic and socio-economic variables in national and cross-national comparison; (2) human ecology, social spatial differentiation of neighborhoods as background variables.

Timothy P. Johnson is director of the Survey Research Laboratory at the University of Illinois at Chicago, and Associate Professor on Public Administration, also at the University of Illinois at Chicago. His research interests include survey methodology, including measurement error in cross-cultural

surveys, and issues related to homelessness. He has published extensively on a range of substantive and methodological issues, including a number of cross-cultural methodological issues.

Achim Koch has been working as a social scientist at the Center for Survey Research and Methodology (ZUMA) in Mannheim since 1986 and was Director of the German General Social Survey (ALLBUS) from 1995 to 2004. He is a member of the ESS Central Co-ordination Team, and heads the contract monitoring work package for the ESS. His major research interests are survey methodology and social monitoring. Recent publications include several substantive articles on attitudes towards foreigners, articles on field work and non-response, and co-editorship of two volumes, one on political participation and another on social change in Germany.

Lars Lyberg is a Chief Scientist at Statistics Sweden. Formerly he was Head of the Statistical Research Unit (1983-1987), Head of the International Research Unit (1988-1992), and Head of the R & D Department (1993-2000) at Statistics Sweden. He received his Ph.D. from Stockholm University in 1981. Since 1985 he is the Chief Editor of the *Journal of Official Statistics*. He is chief editor of *Survey Measurement and Process Quality* (Wiley, 1997) and co-editor of *Telephone Survey Methodology* (Wiley, 1988) and *Measurement Errors in Surveys* (Wiley, 1991). His main research interests are non-sampling errors in surveys, data quality, and organizational quality.

Peter Lynn is Professor of Survey Methodology at the University of Essex and was previously Director of the Survey Methods Centre at the National Centre for Social Research. Peter specialises in all aspects of quantitative data collection methodology and has published widely on topics including survey non-response, weighting, data collection mode effects, respondent incentives, advance letters, sample design and survey quality. His full CV is available at www.iser.essex.ac.uk. Current research interests encompass measurement error, non-response error and sample design - especially in longitudinal

contexts. Peter is editor-in-chief of the on-line journal 'survey research methods' and editor of the forthcoming book "Methodology of Longitudinal Surveys", to be published by Wiley.

Kristen Miller is a methodologist in the Question Design Research Lab at the National Center for Health Statistics. She received her Ph.D. in sociology at the University of Delaware. Her research interests include the impact of culture and social structure in question response and bridging qualitative and quantitative methodologies to improve question design.

Peter Ph. Mohler is Director of ZUMA, a member of the Board of Directors of GESIS (the German Social Science Infrastructure Association) and professor at Mannheim University and heads the European Centre for Comparative Surveys at ZUMA. He is a member of the German Council for Social and Economic data. His major research interests are comparative survey methodology and computer-assisted text analysis. His most recent publications are on comparative research, value change, background demographics and survey documentation.

Beth-Ellen Pennell is the Director of Survey Research Operations at the Survey Research Center, Institute for Social Research, University of Michigan. Ms. Pennell is also a member of the Center's Survey Methods Program and a frequent contributor to the Center's training programs in survey methods. Ms. Pennell serves as the Director of the Data Collection Coordination Center for the World Mental Health Initiative, a joint project of the World Health Organization, Harvard University and the University of Michigan. Ms. Pennell coordinates the technical support and oversees the implementation of the data collection activities for these general population epidemiological studies that are being carried out in 29 developed and developing countries worldwide. Ms. Pennell received her Master's Degree in Applied Social Research at the University of Michigan in 1997.

Manuel del la Puente is an applied sociologist with over 20 years of

professional experience conducting applied social research in the private sector and in the federal government. Currently he is Assistant Division Chief for Survey Methodology in the Statistical Research Division at the U.S. Census Bureau. In this capacity he leads a group of twenty five survey methodologists, anthropologists, social psychologists, and other social scientists dedicated to the study of nonsampling errors in surveys and to the improvement of data quality. Since 1989, Dr. de la Puente has held other positions at the U.S. Census Bureau including Chief of the Ethnic and Hispanic Statistics Branch in the Bureau's Population Division. Prior to joining the U.S. Census Bureau, Dr. de la Puente held research positions at the U.S. Department of Agriculture's Food and Nutrition Service (FNS). Dr. de la Puente began his federal service at the U.S. Government Accountability Office (GAO). His private sector experience includes research positions at The Urban Institute and the National Council of La Raza, both in Washington, D.C. Before coming to Washington, D.C., Dr. de la Puente taught for a brief time at Rutgers University. Dr. de la Puente holds a Ph.D. and an M.Phil. in sociology from Columbia University, an M.A. in sociology from Fordham University, and a B.A. in political science and sociology from St. Peters College in New Jersey.

Evi Scholz is member of the ISSP work group at ZUMA's European Centre for Comparative Surveys. She graduated in political sciences and was researcher in several international comparative projects (on European parliaments, European elections studies, Eurobarometer) of the Mannheim Centre for European Social Research (MZES) and the Zentrum für Europäische Umfrageanalysen und Studien (ZEUS). She was in the team constructing the Mannheim Eurobarometer Trend File, a co-operation project of MZES, ZUMA, and the Central Archive in Cologne.

She was member of the drafting group to develop the source questionnaire for ISSP 2005. She is co-author of several ISSP's study monitoring reports, the methods reports on the German ISSP studies and is

involved in ISSP's demography methods work group. She is mainly interested in international comparative research, especially in background variables.

Alisú Schoua-Glusberg is a cultural/linguistic anthropologist. She uses qualitative techniques for improving questionnaire design, including focus groups, cognitive interviews and ethnographic interviews, specializing in the use of these techniques with Hispanics in the US. Dr. Schoua-Glusberg has pioneered new approaches to instrument translation, a topic on which she has written and presented widely. She has been responsible for design and implementation of data collection strategies and procedures in technically and technologically sophisticated longitudinal and cross-sectional surveys, at NORC, Harvard University, Metro Chicago Information Center and Impaq International. She is General Partner at Research Support Services, a small consulting firm she founded in 1996.

Ineke A.L. Stoop is head of the department of Data Services and IT of the Social and Cultural Planning Office (SCP) of the Netherlands, a policy related research institute, and responsible for (public) procurement of data, data quality, data archiving, survey research methodology and statistical consultancy. She studied psychology at Leiden University and worked previously at the Department of Data Theory of Leiden University and at the Department of Socio-Cultural Statistics of Statistics Netherlands.

She is at present chair of the subcommittee of social statistics of the European Advisory Committee on Statistical Information in the Economic and Social spheres (CEIES), and member of the Central Co-ordinating Team of the European Social Survey, the International Statistical Institute (ISI), and the World Association of Research Professionals (ESOMAR). Her main research interests are survey quality and nonresponse. She has recently finished a PhD thesis on nonresponse in survey research.

Diane Stukel is currently heading the Methodology Unit at the UNESCO

Institute for Statistics (UIS), which she joined in the fall of 2001. She has also held the post of head of Culture and Communications Statistics at the UIS. Prior to that she held the post of Chief of Business Register and Enterprise Survey Methods Section at Statistics Canada, where she worked for eleven years. Earlier in her career at Statistics Canada, she was Senior Statistician responsible for the design and estimation of two flagship surveys: the Canadian Labour Force Survey for the northern territories, and the National Population Health Survey. During her tenure at Statistics Canada, Dr. Stukel was an Assistant Editor of Survey Methodology journal for five years and was the organizer of the Statistics Canada - US Bureau of the Census Methodology Interchange for three years. Dr. Stukel obtained both her Masters and PhD in Statistics at Carleton University. Her research interests lie in survey sampling and she has published several papers in the areas of small area estimation, nonresponse and variance estimation.

Richard Topf is a professor of Political Science at the London Metropolitan University. He joined the University in 1980 after a lengthy spell in the senior civil service and was given a personal chair in 1995. His teaching specialism is empirical political analysis. He is Director of London Metropolitan University's Centre for Comparative European Survey Data. He ranks among the foremost European scholars in the methodology and development of mass opinion databases. He is an Executive Member of the UK Political Studies Association. He has held visiting professorships in the Universities of Helsinki, Mannheim and Umea. He has been main contributor to major data base projects including Beliefs in Government (European Science Foundation); British Election Study (Economics and Social Research Council, UK), and the German Social Survey Information System (ZUMA, Mannheim). He has published widely in academic journals.

Uwe Warner studied sociology and education at the University of Heidelberg. Since 1989, he is senior researcher at CEPS/INSTEAD, Luxembourg. His main

research topics are on cross national comparative survey research and on poverty, income and well being. He is the national coordinator of ESS in Luxembourg and the Luxembourg's delegate at CESSDA and he was in charge to prepare the national ECHP data for Luxembourg.

Christof Wolf graduated in Sociology from Hamburg University and holds a doctorate from the University of Cologne. He was habilitated in 2003 at the University of Cologne. He is currently Scientific Director at ZUMA, responsible for the Social Monitoring Division. His research interests include: Social Inequality and Mobility, Sociology of Religion, Social Networks, Sociology of Health.

Sue Ellen Hansen, ISR University of Michigan, USA; *Juan Diez Nicolás*, ASEP, Madrid, Spain; *Ekkehard Mochmann*, Zentralarchiv, Cologne, Germany, *John MacInnes*, University of Edinburgh and Centre d'Estudis Demogràfics, Universitat Autònoma de Barcelona had to cancel their plans to attend the meeting.
